CUSTOMER SUCCESS STORIES: SEE WHY CUSTOMERS CHOOSE AANVAL

A LEADING TELECOMMUNICATIONS COMPANY

Customer Success Stories: See Why Customers Choose Aanval

Customer Snapshot: A Leading Telecommunications Company

Industry: A telecommunications company with 1000-1500 employees

Customer Overview: The telecommunications company has been an Aanval customer for two years. IT Department was previously using a basic log analysis system that consisted of manually reviewing log data in order to identify suspicious behavior and anomalies. However, the IT Manager wanted a more comprehensive network security solution that can collect, normalize, and analyze log data for better incident response. What their IT department lacked was an event management and attack data correlation technology that supports Snort.

Customer Evaluation of Aanval SAS: During the selection process, the IT Team Leader researched a number of network security solutions including Aanval and evaluated all potential solutions by comparing cost and security features. The telecommunications company decided to purchase Aanval v6 because of the product's event correlation feature and competitive pricing. Due to the company's expansion in business and network size, the IT department now needed a scalable solution that would allow them to deploy multiple Snort sensors across their network. They found their answer with the release of Aanval SAS.

Aanval Has Helped with the Following:

- Improve Incident Response
- Enhance Network Visibility and Situational Awareness
- Boost Security Posture and Defense
- Provide Real-Time Event Monitoring

Customer Success Stories: See Why Customers Choose Aanval

The Top Business Benefits of Aanval:

- Event Management/Collection
- Root Cause Analysis
- Security Automation and Operational Efficiency
- IDS Features and Capabilities
